The Business/Corporate Membership offers a company the flexibility to use rounds of golf and Club access to benefit the Owner, President or CEO as well as designated employees and special guests or customers. All are made to feel like it's their own private paradise. What makes Steel Club's Business Membership different is that the dues structure goes towards a set amount of purchased golf rounds. Within the rounds purchased (for a twelve-month period), the Member of Record designated by the company, is entitled to all of the privileges associated with a Full Golf Membership and is only limited by the total round purchased. The Member of Record can designate any or all of his/her employees to access the company's golf rounds. Client, customer, friends and family can also use the guest rounds when pre-authorized by the Member of Record.

Employees and guests follow the restrictions associated with the Club's Limited Golf Policy. This does not apply to the Member of Record. Tournament rounds count toward the total rounds purchased. All rounds include golf cart and use of the driving range facilities. Any company-authorized individual may use the Club's dining and pool facilities. Utilizing more than one foursome in a given day requires approval from any one of Steel Club's Golf Professionals. This ensures that everyone's round is an enjoyable one.

Additional designated business memberships can be purchased for \$390 a year per member. These additional designated members will have a personal golf locker, club storage, a GHIN account and be eligible for tournament play.
